# INTERFER. OPTIMAL RAW MATERIALS ACQUISITION.

Thanks to our extensive network of suppliers, we are able to meet customer requirements and accommodate any special requests you may have.

We depend on reliable partners in acquiring raw materials, even beyond the borders of Europe. Our high bay warehouse and our well-equipped sawing facilities make us highly efficient. We guarantee «Just-in-time»-delivery and offer you a further relief in your production cycle.

## HIGH-BAY WAREHOUSE

Our fully automated high-bay warehouse offers you just the space you need. Customized to your needs, we will take on all aspects of raw materials procurement, from highly alloyed steel to non-ferrous metals. We will take care of unloading, import control, and warehousing. We deliver directly to your end-customers.

## TRACKING TO ORIGIN

In the case of sensitive applications, it can be vitally important to track the origin of your raw materials up to smelting. We keep the required certificates and hold them available for review at any time. We are regularly audited and have permits for transferring material stamps to raw material sections.

## OPTIMO GROUP AS VERSATILE AS OUR CUSTOMERS

Interfer is a division of the Optimo Group. Our membership in this group assures security and infrastructure without compromising on flexibility and independence.

## RAW MATERIAL ACQUISITION

THROUGH A LARGE NETWORK OF SUPPLIERS, WE SOURCE:

**Bar steel and semi-finished products:** rolled or forged in unalloyed, alloyed, stainless and heat-resistant grades

**Bright steel:** extruded, peeled or ground, in unalloyed, alloyed, stainless and heat-resistant grades.

**Strip steel and sheet metal:** Hot or cold rolled, in unalloyed, alloyed, stainless and heat-resistant grades, including soft magnetic, ball bearing, tool steel, spring strip steel, unalloyed, alloyed, stainless combustion parts.

**Wire:** Extruded or ground, in unalloyed, alloyed, stainless, and heat-resistant grades, including spring steel wires, unalloyed, stainless and heat-resistant, valve wire, tying wire

**Tool steel:** rolled or forged in various grades for cold and hot working

**Non-ferrous metal:** brass, copper, nickel silver, bronze, as strip and bar steel

**Aluminium:** as strip, bar steel, or sheets

**Pipes:** seamless or welded, also available bright finish, in unalloyed, alloyed, stainless and heat-resistant grades, as well as ball bearing steel

## COMPREHENSIVE SERVICE

END-TO-END SERVICE, INCLUDING CUSTOMS CLEARANCE AND DELIVERY

- Flexible order quantities from stock and/or direct from steel mills.
  - Large warehouse and sawing infrastructure
  - Over 3600 storage locations available
  - Processing dimensions up to 1,000 mm
  - Optimized stock availability, short delivery times
  - Reliable just-in-time delivery for seamless logistics
  - Capable of handling large-scale serial production
  - Duty-free warehouse storage options available
-
